OBJECTIVE CARPENTRY/CONSTRUCTION

A position where proven carpentry and construction skills would be of value.

EXPERIENCE

Skilled in carpentry, woodworking, and cabinetry, including project supervision from excavation to trim.

Train and supervise work crews in commercial/residential remodeling and new construction projects; coordinate schedules and all trades.

Order materials and supplies; handle vendor/customer relations and quality control.

EMPLOYMENT

Habitat for Humanity of New Castle County 9/06-present

Assistant Site Supervisor

I assist the Site Supervisor in day-to-day construction activities, instructing and supervising volunteer laborers.

- All aspects of home building
- Trouble shooting mechanical problems
- Being responsible for tool and site organization
- Picking up materials / lumber / supplies for job site
- Site clean-up and maintenance
- Assisting skilled tradespeople
- Leading groups of volunteers as needed in specific work activities

Self Employed 1979-2006

Performed all types of carpentry, including framing and final trim work for commercial and residential remodeling and new construction projects throughout the upstate N.Y. area.

Order materials and blueprint updates; consistently met strict time constraints.

Completed hundreds of projects, including:

- Additions
- Remodels

Veteran – Navy 1976-79

Performed all types of carpentry, including framing and final trim work for commercial and residential remodeling and new construction projects throughout the upstate N.Y. area.

Order materials and blueprint updates; consistently met strict time constraints.

EDUCATION

After completing High School, I took a one year course in Machine Technology, included Architectural Drafting at UCCC in Stone Ridge N.Y. I was a Master Patternmaker/Carpenter on a Destroyer Tender in the United States Navy for 3 years.

PERSONAL

Self-motivated and professional. I take great pride in my work. I'm very attentive to detail and I update and blend new construction into old, making the most of the property's existing features.
